INMATE'S NAME: Loer Bcher, Tamara

ID NUMBER: [REDACTED]

ALLERGIES: Sulfa, Clindamycin, Histamines

DATE/TIME	SOA	PLAN
9-9-14	(continued)	
<p>Her S/S can be related to early pregnancy + nausea + fatigue is common or it can be related to drug withdrawal. Also discussed that if she is under 20 weeks pregnant + bleeding + cramping occurs a miscarriage cannot be stopped. On exam fundus is 2 finger breadths above pubic bone. She is also crying - states she can't feel the baby moved like she used to. Again I discussed to her it is too early to feel fetal movement. She left the office refusing us to have any MR to verify pregnancy + refused urine test for pregnancy. To continue to rest, stay hydrated + continue 2000mg of ibuprofen daily + F/V as R/d. <i>R. Alblen</i></p>		

9-10-14	Examined patient - is	
10 <sup>30</sup> AM	calmer + less confrontational	
B/P 100/64 LBS	today. VS as noted at left.	
P 80 Bg	Reports no diarrhea, some	
A 12	abdominal discomfort	
Temp 98.6	resting quietly when R/d arrived.	
	Continued to refuse to give urine specimen for pregnancy test. She initially agreed to sign refusal then she refused. Form witnessed by myself + W. Mayer. Also refuses to tell us her OB/GYN's name or to release medical records. So taking meds as ordered.	
	Encouraged hydration + to let us know if condition changes. <i>Abundant</i>
